SUMMARY

Third-year CSE student (CGPA 8.4) building full-stack products end-to-end — schema design to WebSocket-based real-time features. Developed two live applications supporting concurrent multi-user sessions at sub-100ms latency with JWT-based authentication and RESTful APIs. Experienced with CI/CD pipelines, Git version control workflows, Agile development practices, and cloud deployment via Vercel.

EXPERIENCE

Web Developer Intern | Net Communication Services Jan 2026 – Feb 2026

- Reduced query execution time ~25% via targeted MongoDB indexing on high-traffic collections; applied Agile sprint workflows throughout.
- Resolved 2 critical real-time production bugs with single-day turnaround using structured Git branching and version control best practices.
- Migrated 3 dynamic pages to Next.js SSG and deployed via CI/CD pipeline, eliminating SSR overhead and achieving near-instant page loads.

PROJECTS

SkillUp Bridge | React.js | Express.js | MongoDB | Socket.IO | JWT | Vercel

- Built interest-based user discovery algorithm reducing irrelevant matches by ~60% vs. unfiltered lists; secured endpoints with JWT-based authentication and middleware.
- Implemented Socket.IO messaging layer supporting concurrent multi-user chat with <100ms delivery and persistent MongoDB history.
- Designed RESTful Express.js backend with average API response time under 200ms; deployed to Vercel with automated CI/CD pipeline.

LiveCanvas | Next.js | Express.js | PostgreSQL | WebSockets | Turborepo | Docker

- Engineered real-time collaborative whiteboard using HTML5 Canvas and transformation matrices at 60fps — zero external canvas libraries.
- Designed WebSocket concurrency model supporting 5+ simultaneous users with conflict-free state sync at <80ms round-trip latency.
- Containerized services using Docker and configured Turborepo monorepo for independent frontend/backend deployment with shared CI/CD workflows.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++

Frontend: React.js, Next.js (SSG/SSR), Recoil, HTML5 Canvas

Backend: Node.js, Express.js, REST APIs, WebSockets, JWT, OAuth

Databases: MongoDB, PostgreSQL, Indexing & Query Optimization

DevOps & Tools: Git, GitHub, Docker, CI/CD, Vercel, Turborepo, VS Code

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks

Methodologies: Agile, REST API design, Microservices, Version Control (Git workflows)

EDUCATION

B.Tech – CSE | Raj Kumar Goel Institute of Technology, Ghaziabad 2023–2027 | CGPA: 8.4/10

Class 12 – NBSE | Holy Cross Higher Secondary School, Dimapur 2023 | 86.6%

Class 10 – NBSE | King's Way School, Dimapur 2021 | 92.5%

ACHIEVEMENTS

- Solved 170+ LeetCode problems (arrays, trees, graphs) — consistently practicing medium–hard range problems across Data Structures & Algorithms.
